SUMMARY

Full-stack developer with 2+ years of experience building and troubleshooting enterprise banking platforms and modern web applications. Strong across Java/Spring Boot backends, Oracle and PostgreSQL databases, and React/TypeScript frontends. Comfortable owning features end to end — from secure API and data-model design to production troubleshooting and platform extensibility.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, Rust (learning)
Backend: Spring Boot, REST APIs, OAuth2, JPA / Hibernate, Maven
Frontend: React (incl. React 19), TypeScript, Tailwind CSS, Zustand, Vite
Databases: Oracle DB, PostgreSQL
Banking / Enterprise: Oracle OBDX, WebLogic, Oracle HTTP Server (OHS), UBS integration
DevOps & Tools: Git, GitHub Actions, Docker / Docker Compose, pnpm

PROFESSIONAL EXPERIENCE

Associate Consultant — JMR Infotech Mar 2024 – Present
Bengaluru, India · Enterprise Banking (Oracle OBDX)

- Configure, customize, and troubleshoot Oracle Banking Digital Experience (OBDX) deployments across WebLogic and Oracle HTTP Server for enterprise banking clients.
- Diagnosed and resolved production incidents including OHS startup failures (missing configuration, orphaned worker processes) and proxy-induced malformed service URLs, restoring platform availability.
- Debugged and fixed Oracle SQL errors (ORA-00933, ORA-00904, ORA-01873) in customized adapter layers, improving the reliability of bespoke banking integrations.
- Authored a comprehensive OBDX Extensibility Guide documenting every major extension point with Java contracts and DB registration scripts, accelerating team onboarding and custom development.

PROJECTS

khanpan — Restaurant / Food-Service Platform
Spring Boot · Java · PostgreSQL · React · TypeScript · Docker

- Built a full-stack restaurant management platform with a Spring Boot backend and a React/TypeScript frontend (Vite, pnpm).
- Designed a secure profile-management module using UUIDv7 primary keys and normalized phone/address child tables, with hardened avatar upload handling.
- Implemented a mobile-number OTP verification flow behind a pluggable SmsSender interface, plus transactional email via Gmail SMTP, and auth with email/password + OAuth2 login and password reset.

Portfolio OS — Browser-Based macOS-Style Desktop Portfolio
React 19 · TypeScript · Vite · Tailwind CSS · Zustand

- Built an interactive desktop-style portfolio with a custom window manager, magnifying dock, mobile-responsive springboard, and a lazy-loading app registry (incl. a playable Snake game).

Developer Tooling — Rust / Tauri Desktop Apps
Rust · Tauri · React · TypeScript

- Building cross-platform native desktop apps — a GUI client for the pass password manager and a Postman-style API client — with CI via GitHub Actions.

EDUCATION

B.Tech, Mechanical Engineering — ITER, Bhubaneswar	2019 – 2023
CGPA: 7.71 / 10	
Senior Secondary (12th), Science — Vijayanjali Science Rec. H.S. School, Kuruda	2019
Secondary (10th) — Jawahar Vidyapitha, Chitrada	2017

PERSONAL DETAILS

Languages: English, Hindi, Odia · **Date of Birth:** 05 April 2002
